Clear Sample Data Guide

Remove the 8 sample FHSA transactions, keep every formula, and start fresh safely. Read this BEFORE entering your own contributions.

THE GOLDEN RULE

NEVER right-click and choose “Delete rows.” It breaks the formulas in the FHSA Portfolio, Tax Dashboard, Analysis & Reco and Dividend Tracker. The only tab you clear is the Transaction Log.

ALWAYS press the Delete key on the selected cells. It clears the values and keeps every formula intact across all 8 tabs.

Why first? If you add your own data on top of the samples, your portfolio value, contribution room, Tax Dashboard and Analysis tab will all be wrong.

8 STEPS TO CLEAR THE SAMPLE DATA

1. **Make your copy first**
   Click your template link, click “Make a copy,” and rename it “FHSA Tracker 2026 — [Your Name].” Always work from YOUR copy in Google Drive.

2. **Open the Transaction Log**
   Click the Transaction Log tab at the bottom of the screen. It’s the only tab with sample rows.

3. **Find row 4**
   Row 1 is the title, row 2 a spacer and row 3 the column headers. Row 4 is the first sample row: 2026-01-02, FHSA, Contribution, $8,000.

4. **Select all sample rows**
   Click cell A4, then press Ctrl+Shift+End (Windows) or Cmd+Shift+End (Mac). This selects rows 4 to 11.

5. **Press the Delete key only**
   Press Delete. Not Backspace, and not right-click → Delete rows. The values clear and every formula stays in place.

6. **Check the reset**
   The Main Dashboard should show $0.00, the FHSA Portfolio should be empty, and the Tax Dashboard and Dividend Tracker should show $0.

7 **Update Settings & Goals**
Fill in the amber cells: name, Active Year, province code, year you opened your FHSA, annual limit, carry-forward room, home goal and target year.

8 **Enter your first transaction**
Go back to the Transaction Log and start at row 4. Every tab updates instantly.
