Your RESP Tracker Is Ready.

Your family's RESP in one Google Sheet · 9 automated tabs · up to 4 children · CESG per child · $50,000 limit check

You need a free Google account, nothing else: no Excel, no app, no monthly fee. The tracker runs entirely in Google Sheets and is yours to keep. It comes with 8 sample transactions so you can see it working before you add your own.

YOUR TEMPLATE LINK: click to open "Make a copy"

GET STARTED: 5 STEPS

1. **Make Your Own Copy**
   Click the link above, then click "Make a copy." Rename it "RESP Tracker 2026 — [Family Name]" and save it to your Google Drive. Always work from YOUR copy, never the original.

2. **Clear the Sample Data**
   Open the Transaction Log, click cell A4, press Ctrl+Shift+End (Windows) or Cmd+Shift+End (Mac), then press the Delete key only. Never right-click → Delete rows. The Clear Sample Data Guide PDF walks you through it.

3. **Update Settings & Goals**
   Fill in the amber cells: your name, the Active Year, each child's name and date of birth (yyyy-mm-dd), and your contribution goals. Each child's last CESG year calculates on its own.

4. **Log Your First Transaction**
   In the Transaction Log, choose Account = RESP and a Type (Contribution, Buy, CESG and so on). Name the child in Description. Canadian ETFs need the TSE: prefix (TSE:XEQT).

5. **Log Each CESG Grant**
   When the grant arrives in your RESP, add a row with Type = CESG and the amount in column K. The RESP Tracker and Analysis tabs total it per child.
