RRSP + FHSA Multi-Brokerage Tracker: User Guide

Every tab, every column and every menu item, in plain English

The tracker is built around one idea: you type each transaction once, in the Transaction Log, and every other tab updates by itself. The only other place you type is the amber cells on Settings & Goals. Everything green is a formula: leave it alone and it will always be right.

Colour	Meaning
Amber	Your input. Type here (Settings & Goals).
Blue	A dropdown. Pick from the list (Institution, Account, Type, Currency).
White	Manual entry in the Transaction Log (date, ticker, shares, price, amount).
Green	A formula. Do not type here.
Teal / Green / Brick / Purple	FHSA / RRSP / home purchase / both accounts combined, on every tab.

Your template link: https://docs.google.com/spreadsheets/d/1lraO-5B0iTD6kX5v4YOrDydgEwsqK4vyraJvrbXtoh4/copy (opens Make a copy).

THE MAPLESHEET MENU

Menu item	What it does
Build / Rebuild All Tabs	Builds every tab. Safe to run again: it keeps your Settings inputs and Transaction Log rows.
Load Sample Data	Fills the Transaction Log with a sample first-time buyer: FHSAs at Wealthsimple and Questrade, RRSPs at Questrade, RBC and TD. Replaces anything in the log.
Clear Sample Data	Empties the Transaction Log. Formulas, dropdowns and Settings stay.
Rebuild Dashboard Charts	Redraws the charts if one goes blank.
About	Shows the version.

First time you use the menu. Google shows an "Authorization required" box. Click Continue, choose your Google account, then Advanced and Allow. The script only works inside your own copy of the sheet.

1. SETTINGS & GOALS: SET UP ONCE, UPDATE EACH JANUARY

Cell	What to enter	Notes
B5 to B8	Your name, province, Active Year and birth year.	Change B7 every January. B9 (RRIF year) is automatic.
B13 to B20	Up to 8 institutions where you have an FHSA, an RRSP or both. Leave a slot blank to hide it.	Use exactly the same name every time.
B23	FHSA annual limit.	$8,000.
B24	Your FHSA participation room for the Active Year, from CRA My Account.	$8,000 + up to $8,000 carried forward. ONE number for all your FHSAs.
B25	Everything you put into your FHSAs in earlier years.	Used for the $40,000 lifetime limit (B26).
B27, B28	The year you opened your first FHSA, and the year of your first qualifying withdrawal (blank until you buy).	B29 shows the year your FHSA must be closed.

Cell	What to enter	Notes
B32, B33	"RRSP deduction limit" and "Unused RRSP contributions" from your latest Notice of Assessment.	B34 = B32 – B33 is your available RRSP room.
B35	The $2,000 lifetime RRSP over-contribution buffer.	Leave it unless CRA changes it.
B36, B37	The Home Buyers' Plan limit ($60,000) and any HBP balance you still owe from before.	Usually $0 in B37.
B44 to B48	FHSA goal, RRSP goal, dividend goal, down payment goal and the year you plan to buy.	Your own plan.
B51 to B52	Default currency and an optional USD/CAD rate.	Leave B52 blank to use the live rate.

The grey cells are a quick reference (deadlines, deduction lines, US withholding). At the bottom are two checklists, one for December and one for January.

2. TRANSACTION LOG: THE ONLY TAB YOU TYPE INTO

One row per transaction, starting on row 4. Never delete old rows: your ACB, room and HBP numbers depend on the full history. **Already own investments?** Log each holding once as a Buy, with column L = what you paid for it, and log this year's contributions so far.

Col	Column	What to enter
A	Date	The trade or deposit date (yyyy-mm-dd).
B	Year	Automatic.
C	Institution	Dropdown from Settings B13:B20.
D	Account	**FHSA or RRSP. Pick it on every row.** It decides which portfolio and which room the row counts in.
E	Type	Dropdown, see the table below.
F	Ticker	Canadian: with the prefix (TSE:XEQT, TSE:RY). US: with or without (KO or NYSE:KO). Blank for contributions.
G	Description	Anything that helps you remember.
H	Currency	CAD or USD. This (not the ticker) decides whether prices are converted to CAD.
I	Shares / Units	For Buy, Sell, DRIP and transfers of shares.
J	Price / Share	For Buy, Sell and DRIP.
K	Commission	Optional.
L	Amt (Original)	The total in the original currency (for a Buy: shares × price + commission).
M	FX Rate	Automatic: 1 for CAD, live USD/CAD (or your override) for USD.
N	Amt (CAD)	Automatic. Every dashboard adds up this column.
O	Check	Automatic. Shows ✓, what is missing, or "FHSA-only type" / "RRSP-only type" if the type does not fit the account.

Type	Account	Use it for
Contribution	Both	Money you put in. FHSA: uses FHSA room, deductible on Line 20805. RRSP: uses RRSP room, Line 20800.
Withdrawal	Both	A taxable withdrawal. Room never comes back in either account.

Type	Account	Use it for
Qualifying Withdrawal	FHSA	Tax-free money out for your first home. Your FHSA must then be closed by the end of next year.
Transfer to RRSP / Transfer from FHSA	FHSA / RRSP	Moving FHSA money to your RRSP: log both sides. Tax-free and uses no RRSP room.
Transfer to FHSA / Transfer from RRSP	RRSP / FHSA	Moving RRSP money to your FHSA: log both sides. Uses FHSA room, not deductible.
HBP Withdrawal / HBP Repayment	RRSP	Home Buyers' Plan money out (tax-free) and each yearly repayment. Neither uses RRSP room.
Buy / Sell	Both	Shares, price and commission, plus the total in column L.
Dividend / DRIP	Both	A cash dividend (log what arrived: in the FHSA, US dividends arrive after 15% US tax), or one reinvested in new shares.
Fee	Both	Account or admin fees.
Transfer Out / Transfer In	Both	A direct transfer between two of YOUR accounts of the same type at two institutions. Log both sides. With a ticker and shares, it moves shares. Uses no room.

3. MAIN DASHBOARD

Section	What it shows
3 big cards	FHSA market value, RRSP market value and the two combined, each with the gain vs cost.
Institution cards	One column per brokerage plus All Institutions: FHSA value, RRSP value, total, gain/loss, FHSA contributions this year, RRSP contributions in the room window and dividends this year.
FHSA room	Participation room this year, lifetime room left (of $40,000), contributed this year (with RRSP transfers in), room left, lifetime room left after this year, and next year's room ($8,000 + up to $8,000 carried forward).
RRSP room	Deduction limit, unused contributions, available room, contributed from March 2 to March 1, room left and withdrawals. Over-contributions within the $2,000 lifetime buffer get a softer warning.
FHSA timeline & deduction	The year your FHSA must be closed, the years you have left, your FHSA deduction this year (Line 20805), RRSP transfers in and qualifying withdrawals so far.
Down payment & HBP	Your FHSA value, how much you can still take under the Home Buyers' Plan, the tax-free down payment that adds up to, progress to your goal, how much more a year you need by your target year, and any HBP balance with the yearly repayment.
Right column	Last 5 transactions, income this year and progress bars for your FHSA, RRSP and down payment goals.
Charts	Market value by institution (FHSA and RRSP stacked), and monthly dividend income.

Two different deadlines. FHSA contributions count for the calendar year: the deadline is December 31. RRSP contributions made in the first 60 days of a year can be deducted on the previous year's return, so the RRSP room for 2026 covers March 2, 2026 to March 1, 2027.

4. FHSA PORTFOLIO AND RRSP PORTFOLIO

Every stock and ETF in that account, all institutions combined: currency (detected from your Transaction Log), shares, average cost in CAD, cost basis, live price in CAD, market value, gain/loss, return % and all-time dividends. Shares = buys + DRIP + transfers in – sells – transfers out.

5. INSTITUTION DASHBOARD

Up to 8 brokerages side by side: FHSA and RRSP market value and cost, total value, gain/loss, contributions to each account and dividends, with both room blocks underneath. On the right, a donut chart and table show what share of your money is at each brokerage.

6. DIVIDEND TRACKER

Eight cards (all-time income, FHSA and RRSP income this year, DRIP, monthly average, full-year estimate, goal and progress), a US withholding estimate, Section A month by month against your monthly target, Section B every dividend and DRIP with its institution and account, and Section C a per-ticker summary with an annual run rate.

US withholding estimate. FHSA: the IRS keeps 15% of US dividends (the treaty exemption does not cover FHSAs); the tracker estimates it from the USD dividends you logged (received × 15/85). RRSP: US-listed dividends arrive in full; the tracker shows the 15% you saved.

7. RRSP & FHSA CRA RULES

The rules that matter when you hold both accounts at more than one institution and plan to buy your first home, as colour-coded cards: red for costly mistakes, amber for limits and deadlines, green for benefits.

EVERY JANUARY

1. **Change the Active Year**
   Settings B7, for example 2026 to 2027. All "this year" numbers switch to the new year.
2. **Update your FHSA room**
   B24 (your new participation room, from CRA My Account) and add last year's FHSA contributions to B25.
3. **Update your RRSP numbers**
   B32 and B33 from your new Notice of Assessment, usually in the spring after you file.
4. **HBP repayment**
   If you owe an HBP balance, make this year's repayment by the RRSP deadline and log it as HBP Repayment.
5. **Keep logging**
   Add new transactions below the old ones. Holdings and ACB carry forward automatically.

TROUBLESHOOTING

Problem	Fix
A price shows $0.00	Canadian tickers need TSE: (TSE:XEQT). NEO: for Cboe Canada. GOOGLEFINANCE can also pause for a few minutes.
A US stock's value looks too low	Its Buy rows must have Currency = USD so the price is converted to CAD.
A transaction is missing from a dashboard	Look at column O. The Institution must match Settings exactly, the Account and Type must be picked, and the date must be a real date.
FHSA room looks wrong	B24 must be your participation room for the Active Year and B25 your contributions in earlier years.
RRSP room looks wrong	B32 is the NOA deduction limit (do not add carry-forward). January and February contributions count for last year.
"This year" numbers are $0	Settings B7 (Active Year) does not match the year of your transactions.
A chart is blank	MapleSheet menu, Rebuild Dashboard Charts.
Something broke	MapleSheet menu, Build / Rebuild All Tabs. Your inputs and transactions are kept.

For educational purposes only. Not financial or tax advice. Rules summarized for 2026 from canada.ca. Always confirm your own room in CRA My Account. Questions: hello@maplesheet.ca
