FHSA Multi-Brokerage Tracker: User Guide

Every tab, every column and every menu item, in plain English

The tracker is built around one idea: you type each transaction once, in the Transaction Log, and every other tab updates by itself. The only other place you type is the amber cells on Settings & Goals. Everything green is a formula: leave it alone and it will always be right.

Colour	Meaning
Amber	Your input. Type here (Settings & Goals).
Blue	A dropdown. Pick from the list (Institution, Type, Currency).
White	Manual entry in the Transaction Log (date, ticker, shares, price, amount).
Green	A formula. Do not type here.

THE MAPLESHEET MENU

Menu item	What it does
Build / Rebuild All Tabs	Builds every tab. Safe to run again: it keeps your Settings inputs and Transaction Log rows.
Load Sample Data	Fills the Transaction Log with a sample person who holds FHSAs at 4 institutions. Replaces anything in the log.
Clear Sample Data	Empties the Transaction Log. Formulas, dropdowns and Settings stay.
Rebuild Dashboard Charts	Redraws the two Main Dashboard charts if one goes blank.
About	Shows the version.

First time you use the menu, Google shows an "Authorization required" box. Click Continue, choose your Google account, then Advanced and Allow. The script only works inside your own copy of the sheet.

1. SETTINGS & GOALS: SET UP ONCE, UPDATE EACH JANUARY

Cell	What to enter	Where to find it
B5 to B8	Your name, province, Active Year (the year you are tracking) and birth year.	Birth year sets the age-71 closing rule.
B9	Year you opened your FIRST FHSA, at any institution.	Your first FHSA statement. Starts your room and the 15-year clock.
B13 to B20	Up to 8 institutions. Leave a slot blank to hide it.	Use the same name every time in the Transaction Log.
B24	FHSA Participation Room for the Active Year: $8,000 plus up to $8,000 carried forward.	CRA My Account, FHSA section, or your Notice of Assessment.
B25	Total you contributed to ALL your FHSAs in earlier years (plus any RRSP to FHSA transfers).	Add up past years. Withdrawals do not reduce it.
B38 to B41	Contribution goal, down payment goal, dividend goal and target purchase year.	Your own plan.
B43 to B44	Default currency and an optional USD/CAD rate.	Leave B44 blank to use the live rate.

B23 ($8,000 annual limit) and B26 ($40,000 lifetime limit) are fixed by law and filled in for you. The rest of the tab is a quick CRA reference and two checklists, one for December and one for January.

2. TRANSACTION LOG: THE ONLY TAB YOU TYPE INTO

One row per transaction, starting on row 4. Never delete old rows: your average cost and lifetime total depend on the full history.

Col	Column	What to enter
A	Date	The transaction date (yyyy-mm-dd).
B	Year	Automatic.
C	Institution	Dropdown from Settings B13:B20.
D	Type	Dropdown, see the table below.
E	Ticker	With the exchange prefix: TSE:XEQT, TSE:VFV, NYSE:KO, NASDAQ:AAPL. Leave blank for contributions and transfers.
F	Description	Anything that helps you remember.
G	Currency	CAD or USD.
H	Shares / Units	For Buy, Sell and DRIP.
I	Price / Share	For Buy, Sell and DRIP.
J	Commission	Optional.
K	Amt (Original)	The total in the original currency. For a buy: shares x price + commission.

Col	Column	What to enter
L	FX Rate	Automatic: 1 for CAD, live USD/CAD (or your override) for USD.
M	Amt (CAD)	Automatic. Every dashboard adds up this column.

Type	Use it for	Uses room?
Contribution	Money you deposit into an FHSA. Deductible on Line 20805.	Yes
RRSP Transfer In	A direct transfer from your RRSP into your FHSA. Not deductible.	Yes
Transfer Out / Transfer In	A DIRECT transfer between two of your own FHSAs. Log both sides.	No
Buy / Sell / DRIP	Investments bought, sold, or bought with reinvested dividends.	No
Dividend	Cash dividends received.	No
Fee	Account or trading fees.	No
Qualifying Withdrawal	Tax-free withdrawal to buy your first home.	Never restores room
Taxable Withdrawal	Any other withdrawal. Added to your income.	Never restores room
Transfer to RRSP	A direct transfer from your FHSA to your RRSP or RRIF.	Never restores room

Moving money between institutions? Ask the receiving institution for a direct FHSA-to-FHSA transfer. If you withdraw and re-deposit instead, CRA counts it as a withdrawal plus a new contribution, and the new contribution uses room.

3. FHSA PORTFOLIO

Fully automatic. Every ticker you have bought appears once, combined across all institutions: shares held, average cost, cost basis (ACB), live price in CAD (GOOGLEFINANCE, US prices converted with the live rate), market value, gain/loss and dividends received. A hidden helper block splits your shares by institution so the dashboards can show each one separately.

4. MAIN DASHBOARD

Section	What it shows
Institution cards	One column per institution plus a Combined Total: market value, cost basis, gain/loss, contributions all time, contributions this year, dividends this year and withdrawals this year. "This year" means the Active Year in Settings B7.
FHSA Contribution Room	Annual limit, your participation room, what you used this year, withdrawals, lifetime contributed, lifetime room left, and ROOM LEFT THIS YEAR: the smaller of your room for the year and your lifetime room left.
Status line	Green when you are fine, amber when you are within $1,000 of your room, blue when you are using carry-forward room, red if you are over-contributed across your FHSAs.
Progress bars	Room used this year, and lifetime contributions out of $40,000.
Timeline & Down Payment	Year your FHSA must close (15-year or age-71 rule), years left, target purchase year, down payment goal, market value and progress.
Last 5 transactions	Your most recent entries, to check nothing is missing.
Charts	Market value by institution, and dividends by month for the Active Year.

5. INSTITUTION DASHBOARD

The same cards side by side for up to 8 institutions, with the share of this year's contributions that went to each one, and the full contribution room block underneath. Use it to see which account is really carrying your returns.

6. DIVIDEND TRACKER

Eight summary cards (all-time and this-year dividends and DRIP, monthly average, full-year estimate, your goal and progress), Section A month by month against your monthly target, Section B every dividend and DRIP with its institution, and Section C a per-ticker summary with an annual run rate. US dividends are entered after the 15% US withholding tax, which FHSAs are not exempt from.

7. FHSA CRA RULES

Every rule that matters when you hold FHSAs at more than one institution, as colour-coded cards: red for costly mistakes, amber for limits and deadlines, green for benefits. The FHSA Government Rules PDF explains each one in more detail.

EVERY JANUARY

1. **Make a copy (optional)**
   File, Make a copy, named for the new year. Or keep one file for every year: the log holds all history.

2 **Change the Active Year**
Settings B7, for example 2026 to 2027. All "this year" numbers switch to the new year.

3 **Update your room**
Settings B24 from CRA My Account: $8,000 plus up to $8,000 of unused room carried forward.

4 **Update your lifetime total**
Settings B25: add last year's contributions (and any RRSP transfers in).

TROUBLESHOOTING

Problem	Fix
A price shows $0.00	Check the ticker prefix: TSE: for Toronto, NYSE: or NASDAQ: for US, NEO: for Cboe Canada. GOOGLEFINANCE can also pause for a few minutes.
A transaction is missing from a dashboard	Check the Institution name matches Settings exactly, the Type is from the dropdown, and the date is a real date.
"This year" numbers are $0	Settings B7 (Active Year) does not match the year of your transactions.
Room looks wrong	B24 must be this year's participation room from CRA, and B25 only earlier years. Transfers between your own FHSAs must be Transfer In / Out, not Contribution.
A chart is blank	MapleSheet menu, Rebuild Dashboard Charts.
Something broke	MapleSheet menu, Build / Rebuild All Tabs. Your inputs and transactions are kept.

For educational purposes only. Not financial or tax advice. Rules summarized for the 2026 tax year from canada.ca (First Home Savings Account). Always confirm your own numbers in CRA My Account. Questions: hello@maplesheet.ca
