Your RRSP + Spousal RRSP Multi-Brokerage Tracker Is Ready.

Your RRSP and the spousal RRSP, at up to 8 institutions, in one Google Sheet · one RRSP room · the 3-year rule · household balance

Every dollar you put into your own RRSP and into a spousal RRSP uses YOUR one RRSP deduction limit, and every spousal contribution starts a 3-year clock before your spouse can withdraw it without the money being taxed back to you. If those accounts sit at more than one bank or brokerage, none of them sees the whole picture. This tracker adds everything up: your room left for the March deadline, which spousal contribution years are safe, how much a withdrawal would cost you, and how balanced your two retirement savings are. It comes with sample data so you can see it working first.

(The /copy at the end of the link makes Google ask you to save your own copy. If clicking does not work, copy the link into your browser.)

GET STARTED: 6 STEPS

1 — Make Your Own Copy
Click the link above, then click Make a copy. Rename it, for example "RRSP + Spousal RRSP Tracker 2026". Always work in YOUR copy, never the original.

2 — Clear the Sample Data
Open the MapleSheet menu at the top of the sheet and click Clear Sample Data. Your formulas, dropdowns and settings stay in place. (First time? Google asks you to authorize the menu: click Continue and Allow.)

3 — Fill In Settings & Goals
Only edit the amber cells: both names, Active Year, both birth years and up to 8 institutions. Then YOUR RRSP deduction limit and unused contributions from your Notice of Assessment. "You" are the contributor: the person who pays into both accounts.

4 — Log Your Contributions
In the Transaction Log, one row per transaction: Date, Institution, Account (RRSP = yours, Spousal RRSP = the one you pay into for your spouse), Type and the amount in column L. Log every spousal contribution from the last 3 calendar years: that is what the 3-year rule looks at.

5 — Log Your Investments
For each purchase: Type = Buy, the ticker (TSE:XEQT for Canadian, KO or NYSE:KO for US), shares in column I and price in column J. US stock? Pick USD in the Currency column. Column O tells you if anything is missing.

6 — Check Before Any Withdrawal
The Main Dashboard shows both RRSPs, each brokerage, your room left and the attribution status. Before your spouse takes money out, open the Attribution Tracker: only SAFE years avoid being taxed to you.
